

Linderhof Palace

After the 30 minute bus journey we arrived at „Linderhof Palace” at 9.10 a.m. Our teachers bought the tickets for a guided tour and after that we had to wait 20 minutes before the tour started.

The tour was very interesting.

The guide told us something about every room and we could see everything. The guide was very friendly because we could ask all questions we had.

After the tour we went to see the Venus Grotto. There, we also got a nice tour. It was very interesting too, because it was built by hand and there is a small waterfall inside. Actually the grotto was built for Wagner, but he was never there. With 19 meter length and 15 meter height it's one of the biggest artificial dripstone cave in Bavaria.

Then we got sweets from our teacher Mrs. Sprengel 😊!!

Afterwards we were allowed to go around in the park on our own. It was very idyllic.

Sadly we had to leave the Palace and went home! ☹
